

Special Issue

Management of Temporomandibular Disorders

Message from the Guest Editors

In the 21st century, dentists often meet with patients suffering from ailments of the stomatognathic system and the surrounding tissues of the head and neck, which they can face challenges in diagnosing and treating. These problems often come from the myofascial and joint systems. They are usually the result of long-term stress, patients' mental problems, and untreated or inadequately treated malocclusion. Often, the treatment of a patient requires the cooperation of a dentist and a physiotherapist in such cases. The Special Issue aims to bring together multidisciplinary approaches to the dysfunction of temporomandibular disorders and myofascial disorders in a basic and clinical aspect. We hope that the current views in this issue will allow us to assess diagnostic and therapeutic perspectives and develop and familiarize ourselves with new research related to multidisciplinary viewpoints. Medicine, dentistry, and physiotherapy are interdisciplinary sciences that seek solutions to facilitate diagnosis, accelerate treatment, and postoperative rehabilitation.

About the Journal

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital
Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q1 (Dentistry, Oral Surgery and Medicine) / CiteScore
- Q2 (General Dentistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
