

Special Issue

Reviews in Dermatology: Current Advances and Future Directions, 2nd Edition

Message from the Guest Editors

Dermatology is a field with various conditions and treatments, which can be a maze for practitioners seeking practical insights. Dermatology reviews help practitioners build a toolbox of approaches by presenting a spectrum of diagnostic and therapeutic options, empowering clinicians to tailor their strategies. In this Special Issue, we will focus on dermatology reviews—articles that provide actionable insights and keep clinicians up to date concerning the everyday world of skin care. Dermatology reviews should be practical guides that break down complex topics into straightforward and usable information. Dermatology is an inherently interdisciplinary field, with connections to various medical specialties. Therefore, reviews on dermatology should bridge knowledge gaps and contribute to a more holistic approach to patient care. As a result, reviews are the key to addressing complex dermatological challenges. This Special Issue is the second edition of “Reviews in Dermatology: Current Advances and Future Directions”. About the Journal

Message from the Editorial Board

Dermato (ISSN 2673-6179) is an international and peer-reviewed open access journal on skin research, including broad aspects of dermatology such as skin biology/development/aging, oncology, inflammation, autoimmunity, regenerative medicine, and stem cell research related to skin; plastic, reconstructive, and aesthetic surgery, etc., published online quarterly by MDPI. It publishes reviews, original research papers, communications, case reports, letters, and short notes. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published.

Editors-in-Chief

Prof. Dr. Chalid Assaf

1. Department of Dermatology and Venerology, Helios Klinikum Krefeld, Krefeld, Germany
2. Institute of Molecular Medicine, Medical School Hamburg, Hamburg, Germany

Prof. Dr. Thilo Gambichler

1. Department of Dermatology, Christian Hospital Unna, Unna, Germany
2. Department of Dermatology, Dortmund Hospital gGmbH, University Witten/Herdecke, Witten, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 37.2 days after submission; acceptance to publication is undertaken in 8.8 days (median values for papers published in this journal in the second half of 2025).
