

Special Issue

Systemic Photoprotection: New Insights and Novel Approaches

Message from the Guest Editors

Ultraviolet (UV) radiation is a key contributor to skin damage, driving many of the visible signs of aging and a large proportion of skin cancers. While topical sunscreens remain fundamental to protecting the skin, there is growing recognition that systemic interventions—such as dietary supplements and pharmacological agents—can complement topical protection and provide whole-body defense against UV injury. This Special Issue brings together dermatologists, pharmacologists, and cosmetic scientists to address the latest scientific and clinical advancements in systemic photoprotection. Our objective is to illustrate how strategies extending beyond topical sunscreens—including dietary and pharmacological interventions—can bolster skin health, reduce the impact of photoaging, and aid in the management of photodermatoses. We welcome original research articles, case series, and review papers that contribute to a deeper understanding of this rapidly evolving field. By showcasing high-caliber studies and innovative perspectives.

About the Journal

Message from the Editorial Board

Dermato (ISSN 2673-6179) is an international and peer-reviewed open access journal on skin research, including broad aspects of dermatology such as skin biology/development/aging, oncology, inflammation, autoimmunity, regenerative medicine, and stem cell research related to skin; plastic, reconstructive, and aesthetic surgery, etc., published online quarterly by MDPI. It publishes reviews, original research papers, communications, case reports, letters, and short notes. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published.

Editors-in-Chief

Prof. Dr. Chalid Assaf

1. Department of Dermatology and Venerology, Helios Klinikum Krefeld, Krefeld, Germany
2. Institute of Molecular Medicine, Medical School Hamburg, Hamburg, Germany

Prof. Dr. Thilo Gambichler

1. Department of Dermatology, Christian Hospital Unna, Unna, Germany
2. Department of Dermatology, Dortmund Hospital gGmbH, University Witten/Herdecke, Witten, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 37.2 days after submission; acceptance to publication is undertaken in 8.8 days (median values for papers published in this journal in the second half of 2025).
