New Insights in Paediatric Dermatopathology 2025

Message from the Guest Editor

Paediatric dermatopathology covers a wide range of disorders including genodermatoses, cutaneous and sub-cutaneous tumours, and inflammatory disorders. Four years ago, we launched a first Special Issue dedicated to paediatric dermatopathology. It included topics such as paediatric panniculitis, auto-inflammatory disorders, paediatric melanoma, tuberous sclerosis complex, spindle-cell neoplasms, congenital cysts, and venous malformations and attracted many readers. The success of this first Special Issue confirmed that dermatopathologists benefitted from having access to a comprehensive, up-to-date resource on key subjects in dermatopathology, and so we decided to publish another Special Issue in this field. This new Issue will endeavour to complement the first, with a wide range of topics in paediatric dermatopathology, focusing on conditions that have not been addressed up until now in this journal, such as paediatric vasculitis, paediatric cutaneous lymphoma, and other haematological disorders, paediatric tumours, desmosomal genodermatoses, keratinopathic ichthyoses, paediatric melanonychias, some disorders of mucous membranes in children, and paediatric cutaneous mucinoses.

About the Journal

Message from the Editor-in-Chief

I have the great pleasure of announcing that *Dermatopathology* has received an updated Impact Factor of 1.6 for June 2024, maintaining its position as the highest rated Impact Factor journal among all the existing dermatopathology journals (with an increasing impact on clinico-pathological correlation articles for clinical dermatologists). This immense success is a result of the excellent work of our Editorial Team, who have engaged in the meticulous selection and peer reviewing of high-quality articles covering different aspects of cutaneous pathology. This journal publishes case reports, communications, full articles, research articles and reviews on clinical, molecular, and investigative dermatopathology in several Special Issues per year. The journal's publications are indexed in PubMed. I encourage all the specialists in cutaneous pathology to submit any original research to *Dermatopathology*.

Editor-in-Chief

Prof. Dr. Gürkan Kaya
