Histological Diagnostics of Malignant Melanoma: State of the Art and Perspectives

Message from the Guest Editors

Malignant melanoma continues to represent a diagnostic challenge for dermatology specialist histopathologists. The extreme variability in clinical pictures, together with its morphological and immunohistochemical heterogeneity, still make it the "great mimic" of human pathology today. In memory of Dr. Antonietta Cimmino, a fine dermatopathologist and student of Prof. G. De Benedictis, from the University of Bari "Aldo Moro", we are launching this Special Issue aimed at collecting original contributions regarding cases, case series, reviews, or original articles that address and shed light on one of the most controversial diagnostic fields of all time.

About the Journal

Message from the Editor-in-Chief

I have the great pleasure of announcing that *Dermatopathology* has received an updated Impact Factor of 1.6 for June 2024, maintaining its position as the highest rated Impact Factor journal among all the existing dermatopathology journals (with an increasing impact on clinico-pathological correlation articles for clinical dermatologists). This immense success is a result of the excellent work of our Editorial Team, who have engaged in the meticulous selection and peer reviewing of high-quality articles covering different aspects of cutaneous pathology. This journal publishes case reports, communications, full articles, research articles and reviews on clinical, molecular, and investigative dermatopathology in several Special Issues per year. The journal's publications are indexed in PubMed. I encourage all the specialists in cutaneous pathology to submit any original research to *Dermatopathology*.

Editor-in-Chief

Prof. Dr. Gürkan Kaya

1. Department of Dermatology, University Hospital of Geneva, 1205 Geneva, Switzerland
2. Department of Clinical Pathology, University Hospital of Geneva, 1205 Geneva, Switzerland

Author Benefits

High visibility

: indexed within ESCI (Web of Science), Scopus, PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.4 days after submission; acceptance to publication is undertaken in 4 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
