

Special Issue

Dermatopathology in Asia

Message from the Guest Editors

It is our pleasure to be able to work on this Special Issue “Dermatopathology in Asia”, under the auspices of the Asian Society of Dermatopathology (ASD). The ASD is a newly established dermatopathology society founded in 2016 and has members from various countries throughout Asia. In this issue, we aim to describe inflammatory dermatoses, cutaneous infections, and skin neoplasms from an Asian perspective. Some of these cutaneous conditions may show an Asian predilection based on genetic, geographical, socioeconomic, or cultural factors. Notes: All submissions to the Special Issue are eligible for a waiver of the Article Processing Charge (APC). If you would like the APC to be waived, please mention this in your covering letter when submitting your manuscript.

About the Journal

Message from the Editor-in-Chief

I have the great pleasure of announcing that *Dermatopathology* has received an updated Impact Factor of 1.6 for June 2024, maintaining its position as the highest rated Impact Factor journal among all the existing dermatopathology journals (with an increasing impact on clinico-pathological correlation articles for clinical dermatologists). This immense success is a result of the excellent work of our Editorial Team, who have engaged in the meticulous selection and peer reviewing of high-quality articles covering different aspects of cutaneous pathology. This journal publishes case reports, communications, full articles, research articles and reviews on clinical, molecular, and investigative dermatopathology in several Special Issues per year. The journal's publications are indexed in PubMed. I encourage all the specialists in cutaneous pathology to submit any original research to *Dermatopathology*.
