Deadline for manuscript  
submissions:

**30 July 2024**

### Message from the Guest Editor

Dear Colleagues,

One of the great technological challenges in the 21st century is the development of renewable materials designs due to the lack of source materials. A new promising area experiencing rapid research development is nanotechnologies, which is currently generating a lot of attention and therefore building great expectations not only in the academic community but also among investors, governments, and industries. This Special Issue will present a collection of the most recent advances in nanotechnology, including theoretical and experimental works related to renewable material production and their applications in energy, sensors, electrocatalysts, etc. The aim of the Special Issue is to introduce several significant contributions to nanotechnology in terms of materials designs from numerous research groups working on different aspects. We think that this paper can be considered as an important bridge between nanotechnology and all the available types of renewable materials design.

Dr. Yen-Linh Thi Ngo

## Message from the Editor-in-Chief

*Designs* (ISSN 2411-9660) is a peer-reviewed and open access journal which provides a unifying research framework for a wide range of engineering designs of disciplines and industrial applications, including mechanical engineering, electrical engineering, civil engineering, mechatronics, aerospace engineering, bioengineering, energy engineering, industrial engineering and manufacturing systems are of interest. We would like to invite you to contribute to the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, Inspec, and other databases.

**Journal Rank:** CiteScore - Q2 (*Engineering (miscellaneous)*)
