Advances in Diabetes: Prevalence, Risk Factors, Complications, Costs and Disparities

Message from the Guest Editors

We invite researchers to submit their works on topic of "Advances in Diabetes: Prevalence, Risk Factors, Complications, Costs and Disparities". The instructions on how to proceed with writing will be available on a dedicated web page. Research areas may include (but are not limited to) the following:

- Epidemiology of diabetes, presenting the latest data on the incidence, prevalence and risk factors across different populations.
- Diabetes' associations with a range of acute and chronic complications that significantly impact patients' quality of life and healthcare resources.
- The economic burden of diabetes on individuals, healthcare systems and society at large, including areas such as healthcare utilization, costs and cost-effectiveness.
- Disparities in diabetes' prevalence, care, and other outcomes across different populations, influenced by social determinants/socioeconomic status and geographic regions, or efforts to reduce these inequities.

We invite you to submit original research articles, systematic reviews, narrative reviews or short communications on this topic. We look forward to your contributions.
