

## Special Issue

# Glycemic Care in Hospitalized Patients with Diabetes: Current Views and Future Perspectives

### Message from the Guest Editor

Dysglycemia contributes to morbidity and mortality in acutely ill patients. Hospital glycemic control has important implications on outcomes. Evolving systems of practice, advancements in technology, treatment alternatives, and the current global pandemic are driving new knowledge. In this special issue of *Diabetology*, authors will contribute to scientific evidence in various domains of inpatient diabetes care and glycemic management. Manuscripts will focus on epidemiology, treatment, complications, system processes, care delivery, technology, health informatics, decision-making, quality improvement, practice performance, education, competencies, and Covid 19. Contributions may derive from qualitative and/or quantitative research. Authors will feature their current work and future perspectives related to glycemic care in the hospital through original research, reviews, case reports, conceptual models and perspectives

### Guest Editor

Prof. Dr. Ariana Pichardo-Lowden

Department of Medicine, Division of Endocrinology, Diabetes and Metabolism at Penn State University, Milton S Hershey Medical Center, Hershey, PA, USA

### Deadline for manuscript submissions

closed (31 January 2023)
