Deep Learning for Early Detection of Cancer

Guest Editors:

Dr. Kawsar Ahmed

Department of Information and Communication Technology, Mawlana Bhashani Science and Technology University, Santosh, Tangail 1902, Bangladesh

Dr. Francis Bui

Department of Electrical and Computer Engineering, University of Saskatchewan, 57 Campus Drive, Saskatoon, SK S7N 5A9, Canada

Dr. Mohammad Ali Moni

Artificial Intelligence & Digital Health Data Science, School of Health and Rehabilitation Sciences, The University of Queensland, Brisbane, QLD 4072, Australia

Deadline for manuscript submissions:

closed (30 November 2023)

Message from the Guest Editors

Cancer is one of the most common and leading causes of death throughout the world. The World Health Organization (WHO) estimates that around 10 million people die of cancer each year, which represents one sixth of the total deaths around the world. There are a lot of reasons behind the spread of cancer among people, such as smoking, high body mass index, alcohol consumption, and lack of physical activity. In addition to that, 30% of the total cancer cases are caused by human papillomavirus (HPV), hepatitis, and other cancer-causing infections.

Early detection of cancer can be a potential solution to reduce the mortality rate. Early treatment by detecting cancer at an early stage increases the probability of survival. Early detection can be performed in two ways: through screening tests and diagnosis. Screening tests are very expensive, which discourages people from lower- and middle-income countries. Thus, a deep learning approach can be a potential solution for the early diagnosis of cancer. This issue aims to collect novel deep learning approaches to detect any kinds of cancers at an early stage.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2023).
