Message from the Guest Editor

Infectious diseases are a leading cause of death and a serious concern for the human population globally. The disease is mainly caused by pathogenic microorganisms, like viruses, bacteria, fungi, and parasites, and rarely by Prions. The genomic analysis of infectious disease plays an important role in the detection, identification, genetic variations, prediction of new pathogen emergence, drug resistance, functional element annotation, disease spread, transmission pattern, vaccine development, therapeutics, designing of control measures, and disease management.

The main objectives of this Special Issue are to provide updated information about advanced molecular diagnostic techniques and genomic analysis of infectious diseases. This SI will explore, but is not restricted to, the following topics: Advanced diagnostic technologies for infectious diseases; Genomic analysis of Infectious agents; Bioinformatics-based diagnostic tools for early detection of pathogens; Comparative diagnostics techniques and promotion of optimal practices of infectious diseases; Emergence/ re-emergence of new isolates/strains/variants of pathogens; Metagenomic analysis of infectious diseases.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2023).
