Dear Colleagues,

The Special Issue of "PET/CT Diagnostics and Theranostics" delves into the cutting-edge advancements in the field of combined positron emission tomography (PET) and computed tomography (CT) imaging. It explores the latest research in diagnostic imaging, highlighting the unique capabilities of PET/CT in detecting and staging diseases. Additionally, it discusses the emerging role of PET/CT in theranostics, a field that combines diagnosis and targeted therapy. This Special Issue aims to provide a comprehensive overview of the latest developments in PET/CT technology and its clinical applications.

Deadline for manuscript
submissions:

31 December 2024

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
