Tong University School of
Medicine, Shanghai, China

Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editor

Diagnosis of pneumonia, which can be caused by both infectious and non-infectious factors, can be tricky in certain circumstances. In particular, the COVID-19 pandemic remains challenging with the emergence of novel SARS-CoV-2 mutants (e.g., Omicron). Early diagnosis with precision and accuracy will contribute to timely disease management and control. Notably, the presentation of cases with pneumonia can vary largely across individuals and can be largely atypical in younger and older individuals and cancer patients

This Special Issue welcomes all aspects relevant to advances in the diagnosis of pneumonia and COVID-19 and especially encourages submissions on novel diagnostic methods and techniques, the application of AI in diagnosis, and diagnosis in specific populations (e.g., younger and older people and cancer patients).

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
