### Message from the Guest Editors

Dear Colleagues,

Cardiomyopathies represent an important cause of major adverse cardiac events and cardiac deaths in Western countries. Early diagnosis, follow up with advanced imaging and correct therapeutic management have been shown to improve the prognosis of patients with cardiomyopathies. Furthermore, advanced imaging can be helpful for invasive electrophysiological and surgical planning.

The aim of this Special Issue is to provide an overview of advanced cardiovascular imaging in cardiomyopathies. In particular, it will be focused on the application of novel CT, MR and echocardiography techniques for the depiction of early involvement, follow up and risk stratification, focusing on future clinical application.

Dr. Giuseppe Muscogiuri

Dr. Valentina Volpato

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*)
