Italy

Dr. Federico Zaottini

IRCCS Ospedale Policlinico San
Martino, Genova, Italy

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

This Special Issue focuses on musculoskeletal imaging (MSKI). Medical imaging techniques have reached a resolution for small and superficial anatomical structures requiring technical and detailed anatomical skills. Recent relevant technical advancements of MSKI can lead to sub-millimetric image resolution. Soft tissue masses evaluated with US and with magnetic resonance imaging as well as MSK-US in the emergency department are other important topics. Radiomics and quantitative MSKI in sarcopenia assessment are emerging applications in this field.

These articles will be useful not only for MSK radiologists but also for general and academic physicians.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
