### Message from the Guest Editors

Dear Colleagues,

Lower genital tract diseases include vulvovaginal and HPV-related diseases, ranging from benign to pre-neoplastic and neoplastic lesions. Nowadays, increasing interest is focused on innovative methods to diagnose and prevent cervical cancer through HPV primary screening programs. However, other lower genital tract diseases are not related to HPV infection, hence cytology, colposcopy and sonography might play a crucial role in assessment and management. This Special Issue aims to address current and emerging issues in the field of the diagnosis, assessment, staging and management of HPV-related and not-related pathology of the lower female ano-genital tract. These may include new advancements in HPV testing and laboratory biomarkers, investigations on the actual role of cytology and implementation of diagnostic tools to implement differential diagnosis, and the current clinical management of lower genital tract diseases.

Dr. Fabio Bottari

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*)
