Deadline for manuscript
submissions:

closed (30 June 2025)

Message from the Guest Editor

Dear Colleagues,

In recent years, there have been significant advancements in non-invasive methods for the diagnosis of dermatological diseases. Non-invasive diagnosis has become an essential tool in modern dermatology. These techniques, such as dermatoscopy, confocal microscopy, and optical coherence tomography, provide high-resolution images of skin lesions, enabling physicians to visualize and analyze skin conditions with unprecedented precision. Advances in these techniques have allowed us to correlate the observed changes with the pathology, leading to more accurate diagnoses.

This Special Issue aims to provide a comprehensive overview of the recent advancements in non-invasive skin imaging techniques, discuss their current use in clinical practice, and shed light on the exciting future prospects in this field.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
