Deadline for manuscript submissions:

closed (31 August 2023)

Message from the Guest Editor

Dear Colleagues,

Rett syndrome is a neurodevelopmental disorder that affects girls almost exclusively. Symptoms include impairments in language and coordination and repetitive movements. Complications may include seizures, scoliosis, and sleeping problems. Other neurodevelopmental disorders, such as attention-deficit hyperactivity disorder, developmental coordination disorder, intellectual disability, autism spectrum disorder, and so on will also seriously affect human normal life and learning. This Special Issue will focus on the latest advances in the diagnosis and assessment of patients with neurodevelopmental disorders. We welcome researchers to submit their original research, comprehensive reviews, and other article types.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
