Message from the Guest Editor

Dear Colleagues,

Cardiothoracic diseases are a leading cause of death worldwide and their early and accurate diagnosis is crucial for effective treatment and management. Non-invasive imaging has revolutionized the way cardiothoracic diseases are diagnosed and evaluated. The use of imaging techniques such as echocardiography, computed tomography (CT), and magnetic resonance imaging (MRI) has greatly improved the accuracy and speed of diagnosis, and therefore patient management and outcomes.

The articles in this Special Issue will provide valuable insights for clinicians, researchers, and technicians involved in the field of cardiothoracic imaging. It is a pleasure to invite you to contribute to this Special Issue entitled “Diagnosis of Cardio-Thoracic Diseases” with original contributions and review articles focused on imaging to demonstrate the continued progress being made in this area and highlight the importance of utilizing these techniques for improving patient outcomes.

We are looking forward to receiving your submissions.

Dr. Tilman Emrich

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
