Message from the Guest Editor

Dear Colleagues,

Breast cancer is one of the most common oncological diagnosis around the world. Challenging topics in breast cancer encompass several professionals: radiologists in pre-surgical diagnosis by imaging and new 3D techniques; pathologist in pathology reports and clinical management of breast lesions of uncertain malignant potential (B3: papillary lesions; pre-neoplastic diseases) and their terminology according to the 2019WHO classification; pathologists and oncologists in the reproducibility of immunohistochemical assessment of biomarkers, intratumoral heterogeneity, reporting and use of new diagnostic tools as TILs evaluation.

Multidisciplinary team is currently the strongest and most robust instrument for the management of breast cancer patients, and it has currently a wider application in every hospital. A multidisciplinary oncological team is not a simple sum of each one of its components, rather it is the result of a multiplication of professionals' capabilities aimed at wise choosing the most appropriate treatment for patients.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)
