Message from the Guest Editors

This Special Issue aims to deepen the diagnostic paths of sleep disorders by integrating data from traditional methods of diagnosing sleep disorders with the most innovative approaches. In addition, we aim to increase our knowledge regarding the management of these disorders in both adults and children, including the use of pharmacological and non-pharmacological options. Therefore, we invite colleagues to present original research, case reports and series, and review papers on the diagnosis and management of sleep disorders to advance the diagnostic workup and treatment of sleep disorders in both children and adults.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
