

Special Issue

Recent Advances in the Diagnosis and Management of Sports Injuries

Message from the Guest Editor

This Special Issue of *Diagnostics* is devoted to the diagnosis and management of sports injuries and sports-related trauma, with the objective of providing an updated, evidence-based, and comprehensive overview of the major challenges in contemporary sports traumatology. The treatment of musculoskeletal disorders in highly demanding patients—particularly athletes—necessarily begins with accurate and timely diagnosis, which forms the foundation for appropriate therapeutic decision-making and long-term outcomes. The contributions to this Special Issue will encompass the full spectrum of sports traumatology, from clinical assessment and advanced imaging modalities to surgical and non-surgical interventions. Particular emphasis will be placed on the integration of new diagnostic technologies and innovative treatment strategies that aim to enhance the precision, safety, and quality of patient care. Special attention will also be given to injuries affecting specific joints and to the management of trauma in distinct populations, including professional athletes, women, and children, who present unique diagnostic and therapeutic challenges.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
