Recent Advances in Oral and Maxillofacial Surgery: Diagnosis and Management

Message from the Guest Editor

Recent advances in oral and maxillofacial surgery have been accelerated by progress in diagnostic imaging, molecular and pathological assessment, digital technologies, and minimally invasive surgical techniques. These innovations have enhanced diagnostic accuracy, optimized treatment planning, and improved functional and oncologic outcomes for patients with oral cancer, congenital deformities, maxillofacial trauma, and inflammatory or infectious diseases.

This Special Issue aims to highlight innovative diagnostic approaches and their impact on clinical management in oral and maxillofacial surgery. This topic is fully aligned with the journal's aims and scope by focusing on the development, validation, and clinical translation of diagnostic methods, rather than purely technical surgical procedures, ensuring a well-defined and balanced scope. Suggested themes include advanced diagnostic modalities, computer-assisted surgery, innovations in oncologic and reconstructive procedures, perioperative management, and outcome evaluation. Original research articles, systematic reviews, clinical studies, and selected case series are encouraged.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
