Diagnosis and Management of Contemporary Issues in Maternal-Fetal Medicine, 2nd Edition

Message from the Guest Editor

Maternal-fetal medicine is a specialized field focusing on managing high-risk pregnancies to ensure the health of both the mother and the fetus. Despite medical advancements, factors such as cardiovascular disease, hypertension, and hemorrhage contribute significantly to rising trends in maternal mortality rates. Moreover, prematurity remains a leading cause of neonatal morbidity and mortality. The exact causes are often multifactorial, involving genetic, environmental, and medical factors. Efforts to prevent preterm labor have shown mixed success rates, highlighting the need for more effective interventions. Rising obesity rates have led to an increase in gestational diabetes, preeclampsia, and other metabolic disorders, complicating pregnancies and increasing long-term health risks for both mothers and infants. Advancements in fetal medicine, such as in utero surgeries and genetic testing, raise ethical dilemmas regarding fetal rights, parental decision making, and resource allocation. To conclude, maternal-fetal medicine faces complex challenges that require a combination of medical innovation, policy reform, and equitable healthcare access.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
