Contemporary Achievements in Diagnosis and Treatment of Gynecological and Obstetric Conditions

Message from the Guest Editor

The female reproductive organs are involved in many pathological conditions in both obstetrics and gynecology. Using a combination of patient history, physical examination, invasive and noninvasive diagnostic tests, and medical or surgical interventions, clinical diagnosis of gynecological and obstetrical diseases entails identifying various conditions of the female reproductive system and pregnancy complications. In this Special Issue, the most common diagnostic and imaging tools, or those currently under development, will be covered and discussed in a broad and detailed manner, with a particular focus on tests that use artificial intelligence. The aim of this Special Issue is to provide up-to-date insights into contemporary achievements in diagnosis and the treatment of gynecological and obstetric conditions. Manuscripts investigating outcomes associated with new diagnostic and therapeutic procedures are encouraged, as are studies addressing less common conditions or outcomes.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
