Advances in the Diagnosis and Management of Atrial Fibrillation and Heart Failure

Message from the Guest Editor

The interaction between atrial fibrillation (AF) and heart failure (HF) is a complex and multifactorial problem that requires further investigation. The coexistence of AF and HF can lead to a vicious cycle where each condition exacerbates the other through mechanisms such as structural cardiac remodeling and activation of neurohormonal systems. The clinical course of AF and HF varies depending on the cause and type of CHF and AF. New cardiac-specific biomarkers, cardiac imaging and remote monitoring can potentially improve the diagnosis and understanding of AF and HF disease progression, but more research is needed to determine their influence on both diseases. With the advancements in digital technology, there are many opportunities for early diagnosis of AF and CHF. The Special Issue will explore the latest research on this topic and provide insights into the prevention, diagnosis, and treatment of both conditions. This issue aims to add value to the scientific community and improve the lives of patients suffering from AF and HF by providing a comprehensive understanding of the interaction between these two conditions and the optimal management of patients with both AF and HF.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
