State of the Art of Abdominal Radiology

Message from the Guest Editor

In the last few decades, diagnostics in abdominal and pelvic pathology have vastly improved. Today, MRI is an indispensable tool in the diagnosis of liver or pancreatic pathology and in the local staging of pelvic cancers. This issue of *Diagnostics* will specifically focus on novel MRI techniques in the diagnosis of both diffuse and focal liver pathology. Research papers that highlight progress achieved using ultrasound techniques in the diagnostics of diffuse liver disease are also welcome. The pre- and postoperative evaluation of digestive cancer remains an important task of an abdominal radiologist. Qualitative imaging and radiomics can help predict the histopathological characteristics of a tumor and may offer additional tools in establishing the prognosis of a patient. The aim of this Special Issue is to publish new advancements and trends in diagnostic and interventional abdominal radiology. Research and review articles regarding the presented and related topics are appropriate for submission to this Special Issue of *Diagnostics*.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
