Advanced Role of Genetic Biomarkers in Clinical Diagnostics

Message from the Guest Editor

Clinically, Genetic Biomarkers (GBs) have been used to screen for diagnosis, monitor symptomatology, guide biochemically targeted treatment and tailored regimens, and evaluate treatment outcomes. Numerous genetic biomarkers have the potential to be associated with an extensive scope of clinical events and procedures. This Special Issue investigates the rapidly developing area of emerging genetic biomarkers (GBs) in clinical diagnostics and their applications, which offer fresh impetus to the clinical care of patients.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
