# Laboratory Tests for Kidney Diseases

#### Message from the Guest Editor

This Special Issue aims to provide a comprehensive overview of the current laboratory testing methods and technologies used in the diagnosis, monitoring, and management of kidney diseases. This Special Issue will cover a wide range of topics, including the evaluation of kidney function, the assessment of renal injury, the detection of specific biomarkers, and the use of novel diagnostic approaches. The scope of this Special Issue also encompasses the application of laboratory testing in the early detection and prevention of kidney diseases, as well as its role in guiding treatment decisions and predicting patient outcomes. Overall, this Special Issue seeks to highlight the critical role of laboratory testing in the care of patients with kidney diseases and to promote the advancement of diagnostic tools and strategies in this field.
