Diagnostic Radiology for Breast Cancer

Message from the Guest Editor

Early and accurate diagnosis remains the cornerstone of improving breast-cancer outcomes. Over the past decade, diagnostic radiology has evolved rapidly, integrating digital breast tomosynthesis, contrast-enhanced mammography, abbreviated and full-protocol breast MRI, targeted ultrasound, and, more recently, artificial-intelligence-driven image analysis and radiomics. These innovations promise higher cancer-detection rates, lower recall burdens, risk-stratified screening pathways, and more precise preoperative staging. This Special Issue invites original research and comprehensive reviews that evaluate novel imaging techniques, compare diagnostic performance across modalities, explore AI applications, assess cost-effectiveness, and refine imaging-guided interventions. Our goal is to accelerate the translation of cutting-edge imaging science into equitable, patient-centered breast-cancer care.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
