

Special Issue

Pulmonary Disease: Diagnosis and Management

Message from the Guest Editor

Pulmonary diseases have exerted a considerable impact on human health throughout history. A myriad of viruses and bacterial pathogens induce pulmonary infections. Recent progress in diverse research methodologies has substantially enhanced the diagnostic and therapeutic landscape of respiratory conditions. Applications of molecular diagnostics, single-cell RNA sequencing, microbiome analyses, and organoid models to pulmonary disease research are proliferating. These approaches have yielded numerous instruments for elucidating etiology, refining diagnostic criteria, forecasting prognoses, and identifying therapeutic targets. In the context of emerging pharmacotherapies, active scholarly collaboration and the swift, precise dissemination of research findings among scientists are paramount. Accordingly, this special issue is dedicated to presenting an updated compendium of advancements in pulmonary medicine, aiming to stimulate interest and discourse in the domain.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
