Advances in Modern Diabetes Diagnosis and Treatment Technology

Message from the Guest Editors

We are pleased to invite you to contribute a paper to our Special Issue related to diabetes diagnosis and treatment. Diabetes is one of the fastest-growing global health emergencies of the 21st century. In the last 15 years, the number of people diagnosed with type 2 diabetes, a condition closely related to obesity and metabolic syndrome, has increased by 95%. The most devastating effects of diabetes are its chronic complications since diabetes is still the leading cause of preventable blindness in the adult working population, nontraumatic amputations, and renal failure. Despite the growing awareness of diabetes, its complications continue to represent a significant public health problem with a high health expenditure. Considering this context, we welcome submissions to this Special Issue focusing on the advances in the diagnosis of chronic complications and the treatment technology of modern diabetes and insights into this disease. The detailed knowledge of this harmful disease is needed to prevent chronic complications and cardiovascular disease/death and optimize quality of life.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
