

Special Issue

Advances in Pathology for Forensic Diagnosis

Message from the Guest Editors

We are pleased to introduce you a Special Issue entitled “Advances in Pathology for Forensic Diagnosis”, which aims to collect high-quality papers that reflect the advances of the diagnostic tools used in both forensic pathology and clinical forensic medicine. Notably, in forensic practice, histopathology, immunohistochemistry, toxicology, forensic radiology, molecular biology, and forensic entomology have become routine and essential tools in supporting the postmortem diagnostic processes and are considered particularly valuable when dealing with complex cases. At the same time, in clinical forensic medicine, genetic and toxicological analyses undoubtedly represent an important tool for reaching a more accurate diagnosis, especially in cases of physical or sexual violence. Increasing attention is now also paid to molecular autopsy and -omics sciences, such as genomics, proteomics, and metabolomics. All these aspects highlight the importance of an integrated multidisciplinary approach, in which forensic pathologists closely collaborate with experts from other fields, such as radiology, genetics, anthropology and forensic odontology.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
