Recent Advances in Gynecologic Oncology: From Diagnosis to Prognosis

Message from the Guest Editor

Cancers of the female genital organs are known explicitly as gynecological cancers, including tubo-ovarian cancer, uterine and cervical cancer, vaginal cancer, and vulvar cancer. The optimal screening methods for gynecologic cancers are still being investigated. Cervical cancer is the only gynecologic malignancy for which a screening modality is widely accepted and recommended to all women. Surgery is the primary treatment for several gynecological cancer patients. However, further treatment (adjuvant therapy and/or maintenance therapy) is required in some patients. Additionally, in patients with advanced or recurrent diseases, the outcome may be disappointing. This Special Issue will publish reviews and original papers on detection, prevention, diagnosis, and treatment of gynecologic malignancies. Therefore, gynecologists, medical oncologists, radiation oncologists, radiologists, pathologists, and research scientists with a special interest in gynecological oncology are invited to submit manuscripts for publication in this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
