Radiology in the Third Millennium: New Patient-Centered Diagnostic Approaches

Message from the Guest Editors

Radiology is rapidly evolving in the third millennium, driven by technological innovation and a shift toward patient-centered care. This Special Issue explores the integration of advanced diagnostic techniques with personalized medicine, encouraging collaboration across research, clinical practice, and industry. We welcome submissions on topics including:

- AI-assisted and hybrid imaging technologies
- Precision diagnostics and theranostics
- Multimodal imaging approaches
- Patient-centered and ethical aspects of radiology
- Radiomics and big data applications
- Innovations in contrast and functional imaging
- Imaging in precision oncology and targeted therapies
- Future directions for radiology in personalized care

We invite contributions from all imaging disciplines that foster interdisciplinary insights—from foundational research to clinical application.
