# Precision Medicine for Cerebellar Disorders: From Bench to Bedside

### Message from the Guest Editors

The cerebellum is a key-subcortical structure in the CNS, and is now being considered as a major hub for motor and cognitive activities. Cerebellar disorders are particularly disabling. The Special Issue will gather contributions on the topic of precision medicine at a pre-clinical stage and in the multiple cerebellar ataxias encountered in the clinic. Original research, reviews, mini-reviews and case descriptions will be considered.
