Risk Factors for Acute Ischemic Stroke

Message from the Guest Editor

Acute ischemic stroke is one of the major causes of disability and death worldwide. Faster diagnoses and emergency interventional treatment remain the best approaches for improving the outcomes of patients. Currently, the recognized risk factors for acute ischemic stroke include age, high blood pressure, atrial fibrillation, diabetes mellitus, congestive heart failure, etc. This Special Issue aims to collect the recent advances in the pathophysiology underlying acute ischemic stroke; the risk factors for ischemic stroke; stroke presentation; the diagnosing and monitoring protocols that are critical to patient recovery.

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
