

## Special Issue

# Innovative Research and Operational Advances in the Diagnosis of Hematologic Diseases

### Message from the Guest Editor

This Special Issue focuses on innovative research and operational advances that improve the diagnosis of hematologic diseases and accelerate translation into routine clinical practice. Emphasis is placed on approaches that move beyond discovery to implementation, scalability, and real-world impact within clinical laboratories and healthcare systems. Topics of interest include molecular and genomic diagnostics, artificial intelligence and digital pathology, biomarker validation, and updates to hematopathology classification systems, as well as operational innovations such as laboratory workflows, quality metrics, standardization, automation, and informatics-driven decision support. Submissions highlighting the clinical adoption of new technologies, integration into existing diagnostic pathways, and measurable improvements in diagnostic accuracy, efficiency, or patient care are particularly encouraged. The goal of this Special Issue is to provide a practical and forward-looking perspective on how research advances and operational innovation together are reshaping modern hematologic diagnostics.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
