Diagnosis and Management of Esophageal Disorders: Modern Approaches

Message from the Guest Editors

Esophageal disorders represent a diverse group of conditions that significantly affect gastrointestinal function, quality of life, and in many cases long-term health outcomes. Over the past two decades, advances in physiology, imaging, and molecular science have transformed our understanding of esophageal diseases. This rapidly evolving field requires clinicians to integrate advances in esophageal physiology, minimally invasive endoscopic therapies, and personalized medical management. Continued research is essential to refine diagnostic criteria, optimize treatment algorithms, and improve long-term outcomes for patients with these complex conditions.

For this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following: diagnosis and management of eosinophilic esophagitis, GERD (in particular, refractory to treatment with proton pump inhibitors, extraesophageal manifestations of GERD, and non-erosive phenotype), achalasia, esophagogastric junction outflow obstruction, and lichen planus.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
