Computer-Aided Diagnosis in Endoscopy 2025

Message from the Guest Editor

Advancements in artificial intelligence (AI) are transforming endoscopic diagnosis by improving lesion detection, classification, and decision-making. With this in mind, "Computer-Aided Diagnosis in Endoscopy 2025" explores the latest developments in AI-driven endoscopy, including deep learning, multimodal data integration, and clinical applications. This Special Issue aims to bring together experts in gastroenterology, computer science, and medical imaging to highlight innovations that enhance diagnostic accuracy and patient outcomes. Researchers and clinicians are thus invited to contribute studies that bridge AI advancements with real-world endoscopic practice; we look forward to your contributions.
