Advances in Laboratory Analysis and Diagnostics

Message from the Guest Editor

This Special Issue highlights groundbreaking innovations in laboratory analysis and diagnostics, addressing critical challenges in clinical medicine and biomedical research. The contributions cover advanced methodologies in clinical chemistry, clinical biochemistry, and laboratory medicine, emphasizing precision, efficiency, and diagnostic accuracy. They additionally explore cutting-edge technologies, including high-throughput experimentation and data management platforms, while also examining the role of interdisciplinary approaches in advancing medical biochemistry and point-of-care testing. These developments promise to reshape diagnostic paradigms, enhance patient care, and drive progress in precision medicine.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
