Diagnostics Signatures of Breast Cancer

Message from the Guest Editor

Breast cancer (BC) is the most common malignancy among women worldwide. Its diagnosis is difficult due to different types of breast tumors. The new methods for the detection of BC are promising because they guarantee a precise targeted treatment of tumors. We are pleased to invite you to submit a paper to this Special Issue, which will highlight more recent advances in methods of BC diagnosis, such as molecular signatures, micro-RNA, and bioinformatics methods. The aim of this Special Issue is to collect articles that highlight the currently available BC diagnostic strategies and those advanced ones based on molecular signatures or biomarkers being developed as state-of-the-art early screening and diagnostic technologies. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Pathological diagnostic tools for breast cancer;
- Molecular diagnostics of breast cancer;
- Omics in breast cancer;
- Early diagnostics of BC.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
