Diagnosis and Management of Nasal and Sinus Disorders

Message from the Guest Editors

Nasal and sinus disorders, such as acute/chronic rhinosinusitis, nasal polyposis, allergic/non-allergic rhinitis, empty nose syndrome, etc., frequently cause physical and psychiatric illness. Despite the rapid progress of medicine, some sinonasal disorders remain complex and have a significant impact on the global economy in the modern era. Early detection and proper management of the sinonasal airway deserve further attention. Advances in timely diagnosis and proper management would provide practical information about precise prognosis and likely response to medical or surgical therapy and are therefore pivotal. On account of the great advances in the molecular and pathophysiological understanding of complex sinonasal disorders, the relevance of advances for the diagnosis and management has attracted a great deal of attention. This Special Issue will address current advances in the diagnosis and management of sinonasal disorders.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
