Diagnostic Imaging of the Female Pelvis

Message from the Guest Editors

For many decades, pelvic imaging has been poorly explored, mainly because of the technical limitations that made it difficult to obtain good quality images, and surgical exploration was required for diagnosing and staging most pelvic pathologies. Nowadays, thanks to the rapid technical developments that enabled us to obtain high-quality diagnostic images that accurately depict the pelvic content, pelvic imaging has become a cornerstone in differential diagnosis, preoperative planning, and extension evaluation of almost every pelvic disease. In comparison to the male pelvis, the female pelvis is characterized by a more complex anatomy and is associated with a wider spectrum of benign, and malignant pathologies. Moreover, female pelvic structures undergo important changes during the life cycle. The aim of this Special Issue is to illustrate the state-of-the-art in the imaging of the female pelvis, for benign and malignant, structural and functional, pathologies, in order to help radiologists and gynecologists in their everyday clinical practice.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
