## Fetal, Placental, and Pediatric Dermatopathology: From Development to Disease

## Message from the Guest Editors

The investigation of pathological processes across early life, from fetal development to childhood, provides valuable insights into the origins and progression of human disease. The placenta, as a dynamic interface between mother and fetus, offers key information on developmental adaptation, while the study of fetal and pediatric tissues sheds light on the morphological and molecular foundations of numerous disorders. Within this context, pediatric dermatopathology holds particular significance. Skin manifestations in neonates and children often reflect underlying genetic. inflammatory, or systemic conditions, many originating during intrauterine development. Understanding these relationships enhances our knowledge of disease mechanisms and improves diagnostic precision. This Special Issue welcomes contributions examining fetal, placental, and pediatric dermatopathology from morphological, molecular, and clinical perspectives. We particularly encourage studies integrating histopathological, immunohistochemical, and clinical data, or those exploring the developmental transition from prenatal pathology to postnatal disease.

## **About the Journal**

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

### Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
