Recent Advancements in MRI and PET/CT Technologies in the Field of Urologic Oncology

Message from the Guest Editor

This Special Issue, 'Recent Advancements in MRI and PET/CT Technologies in the Field of Urologic Oncology', aims to provide an overview of the recent technical developments in imaging for prostate cancer and their clinical relevance, with a special focus on MRI and PET/CT. This Special Issue aims to collate original papers, review articles, and case reports based on the clinical relevance and improvement achieved with the use of imaging modalities, such as PSMA PET/CT imaging, PSMA PET/MRI and whole-body MRI. We would like to provide an enhanced and detailed overview of the state of the art of the clinical impact of these novel staging and re-staging tools as well as their pitfalls. Additionally, we will include a final discussion by experts in this field that summarizes and interprets the findings of this Special Issue concerning future developments and their potential applications.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
