Recent Advances in Radiomics for Medical Imaging: Second Edition

Message from the Guest Editor

With the rapid development of medical technology, medical imaging has undergone tremendous changes in the past few years. Among them, radiomics, an emerging medical image analysis method, has shown great potential in diagnosis, prognosis prediction, efficacy evaluation and personalized treatment. Radiomics extracts, analyzes and mines a large amount of high-dimensional information contained in medical images to achieve accurate diagnosis and in-depth understanding of diseases. Compared with traditional image analysis methods, Radiomics can reflect the characteristics of lesions more comprehensively and accurately, and improve the accuracy of diagnosis. This Special Issue invites experts and scholars in related fields to submit in-depth discussions and studies on the latest research progress in radiomics for medical imaging. We aim for this Special Issue to platform and inspire the application and development of radiomics in medical imaging and to further contribute to maintaining human health.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
