

## Special Issue

# Diagnostic Imaging of Liver Diseases

### Message from the Guest Editors

Imaging is critical in the management of liver diseases because it allows for early detection, accurate diagnosis, and monitoring disease progression. A general approach to evaluating a patient with liver disease begins with a simple ultrasound, followed by computer tomography or MRI in inconclusive diagnosis. Liver disease often develops without any signs or symptoms, and it is often detected in the late stages through complications with a significantly poor prognosis. Over the last decade, we have witnessed an increase in non-invasive ultrasound techniques such as contrast enhanced ultrasound or elastography and advances in imaging that have led to better understanding and diagnosing of liver diseases. This Special Issue aims to include research that will advance current knowledge in the field of liver diseases. The papers need to explore diagnostic challenges, present new non-invasive elastography techniques or validate existing ones and provide new insights into how imaging can improve health and quality of life in subjects with liver diseases.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
