Hepatobiliary and Pancreatic Tumors: Advanced Diagnosis and Management

Message from the Guest Editor

Hepatobiliary and pancreatic tumors present significant diagnostic and therapeutic challenges, and they continue to constitute a significant health burden with an ultimately poor prognosis for the most malignant tumors. More work must be necessary to refine the risk factors, optimize the screening modalities for premalignant lesions, enhance imaging for diagnosis, apply imaging modalities as biomarkers for disease prognosis and predicting treatment responses. Ultimately, these will enhance new drug development efforts and will translate into an improvement in our patients' quality of life, alleviate suffering and improve overall survival.

This Special Issue seeks to assemble papers around the above themes. We are therefore looking forward to receiving original research articles, review articles and short communications in these areas. We welcome articles that explore the disparities in screening, diagnosis, treatment and biomarker development, and those that explore the role of artificial intelligence across the translational and clinical landscape of hepatobiliary and pancreatic tumors

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
