Ultrasound Elastography in Diagnosis

Message from the Guest Editors

Diagnostic ultrasound (US) became an integral part in the daily clinical routine used by many different subspecialties. In recent years, technology has evolved and there has been an increase in new ultrasound techniques such as elastography techniques including both parametric shear wave elastography and semiquantitative strain elastography. We are pleased to invite you to submit work regarding new aspects and applications for the use of US elastography for tissue characterization or the assessment of focal lesions. This Special Issue will present the challenges and recent advances in the use of US elastography for diagnosis. Both original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: liver assessment, genitourinary imaging, MSK imaging, head and neck imaging, assessment of focal lesion, and basic research. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
